If you are not comfortable installing the mounting plate or want to mount the plate to metal or concrete surfaces check with your local home center/hardware retailer or independent contractor.

NOTE: The mounting/un-mounting of this safe is at the consumer's expense and discretion. LH Licensed Products is not responsible for any costs incurred for mounting/un-mounting this product.

MOUNTING

1. The safe is packed with the mounting plate secured to the top of the safe. To remove, locate the mounting plate release key. Insert it into the lock located at the top on the front of the safe and turn fully to the left counter clockwise (Figure 1). Remove the mounting plate by sliding it backwards until it is off the sliding track (Figure 2).

2. Determine the location that you want to install the safe and place the flat surface of mounting plate against the flat wood mounting surface. While holding the plate in place, use a pencil to mark the holes where you will need to drill. There are 4 mounting holes that you will need to mark (Figure 1)

3. Once you have marked the hole positions, remove the mounting plate and use a 1/8 inch size drill bit to make 4 pilot holes (Figure 1).
